

CASAMBI PIR motion and brightness sensor

Order number: 5117

- PIR motion and brightness sensor for convenient operation of luminaires via CASAMBI app
- including bezels to optimize the sensor detection range
- sturdy mounting brackets ensure a secure hold
- mounting height: max. 4m (ceiling mounting)
- detection area: max. 10x4m (ceiling mounting)
- compatible with surface mount housing (art. no. 5118)
- power supply via mains
- complete control via CASAMBI App:
- presence/absence detection
- ambient light dependent control of luminaires/scenes
- Light duration and fade-in/fade-out times

Different functions of the sensor possible:

1. on/off function on pre-installed scene via sensor, then 0% luminosity with optional fade-out time.
2. on/off function on pre-installed scene via sensor with adjustable afterglow duration/force with optional fade-in/fade-out time
3. deactivation of manual control and exclusive control via sensor

protection class (IP): IP20; Input voltage: 220 - 240 V AC; Control method: other; ETIM Gruppen-ID: EC002924; Suitable for CASAMBI: Yes;
BEG funding: Only relevant in Germany
diameter: 85mm
